

Cake Lines

Beldos cake line is a modular system for semi-automatic cake production. It means that all machines can function autonomously and the line can be fitted with additional devices any time and grow step by step - depending on your budget and production needs.

The line can have various lengths and will be designed for your particular request according to the available area and necessary production capacities.

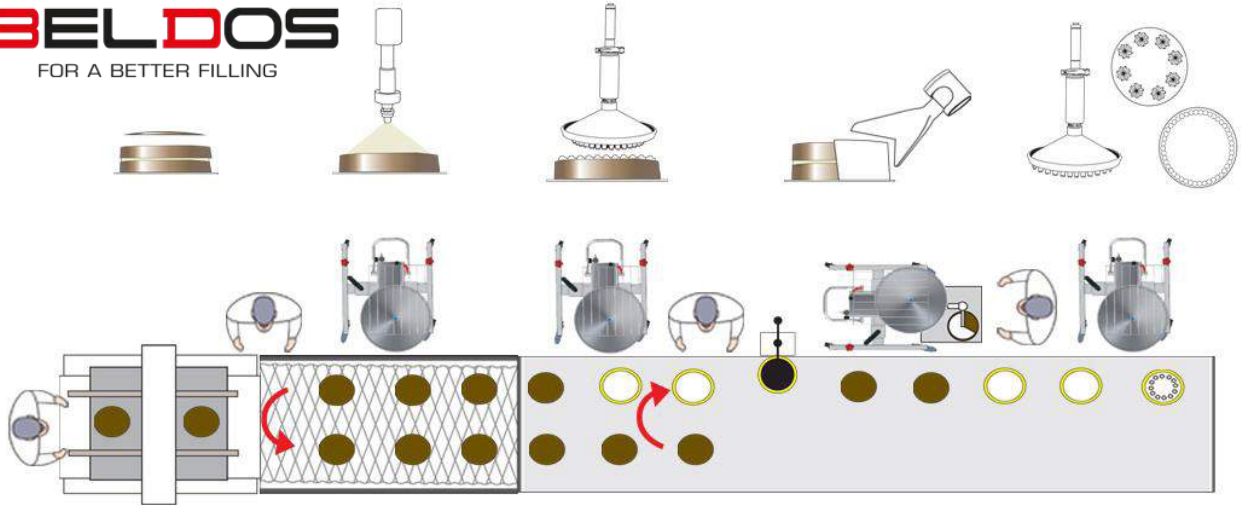

Cake line offers are custom made. Please contact Beldos for more information.

Capacity: up to 8 cakes per minute
